Preparatory Two –1st Term 2017 Questions Bank

Concepts and the basics of Internet sites

Question 1: tick (✓) in front of the correct term and mark (X) in front of the incorrect term:

1. **Hyperlink is a webpage or more, connected with each other. ()**
2. **The website can be visited on the computer only. ()**
3. **The Web page is a document with an electronic content published online. ()**
4. **The Web site is the first page and through which to navigate to other pages on the site. ()**
5. **The home page is the last page of the Web site. ()**
6. **Web page consists of pictures, text, audio, and video. ()**
7. **The hyperlink may take you to another page outside the site. ()**
8. **You can subscribe to more than one location at the same address Script. ()**
9. **Static Web pages using HTML commands in their design in addition to other languages such as Java script. ()**
10. **Static Web pages displays information to see and reading only. ()**
11. **Interactive Web pages do not allow users to perform any processing on content. ()**
12. **The hyperlink from Web page elements. ()**
13. **To create an interactive Web page enough in its design Html Commands only ()**
14. **Static Web pages do not allow users to perform any processing on content. ()**
15. **Examples of static webpages SIS website. ()**

16. Interactive Web pages display content allows users to interact with and processing. ()

17. Static Web pages using HTML commands in their design only. ()

Question2: Compare between static Web pages and interactive Web page

In comparison	Static Web pages	interactive web pages

Question 3: complete the following statements:

1. ……. a Web page or more connected with each other under a specific name.
2. Web page consists of …….,……..,……..,……..
3. ……. It is a document with electronic content Published on the internet.
4. …… has web address on the internet is called Web Address
5. Web pages types are divided into ……,……
6. Web pages..... Using only HTML commands in their design.
7. Web pages..... Content of these pages is previously prepared Web by the page developer and can't be edited

8. **Web pages..... displays information is to see and reading only**

9. **…… It is the first page of the Web site and through which go to other pages on the site.**

10. **……..text or image is linked to a specific address, when pressed is going to this address.**

11. **Web pages..... Display content allows users to interact with and Processing.**

12. **Web pages..... Used to design HTML commands in addition to other languages like PHP and Java Script language**.

13. **Examples of interactive Web pages the site…….**

14. **Interactive Web page is ……**

15. **The Web site is……..**

16. **Static Web pages is ……..**

17. **Home page is …….**

18. **The Web page** is …….

Question 4: put the right word in the right place

((The Web site – HTML – Home Page – sounds – PHP –-Internet browser-Web Address – Interactive-mobile phone - static))

1. **The Web page is a document with an electronic content published on the Internet and is displayed by a program…….**

Preparatory Two –1st Term 2017 Questions Bank

2. **Examples of Web pages…….. the page "contact us" with the Ministry of education website**.
3. **You can visit the Web site through……**
4. **A Web page consists of a set of images, texts,..... and videos and hyperlinks.**
5. **Web site has address on the Internet is called.....**
6. **Uses Web pages..... to view the information see and reading only**
7. **..... Used to design interactive Web pages**
8. **……The first page of the Web site through which easily navigate to other pages in the site.**
9. **From Languages used to design static and dynamic Web pages ……..**
10. **Web page or more connected with each other under a specific name …….**

Question 5: choose the correct answer:

1. **A Web page or more connected with each other under a specific name …….**

 (Web page-Website-Home page - Interactive page)
2. **A document with the content of electronic published on the Internet …….**

 (Web page - Web site - Home page -Hyperlink)
3. **The first page of the Web site and through which go to other pages on the site …….**

 (Static page - Website- Home page - interactive page)
4. **Text or image is linked to a specific address, when pressed is going to that address …….**

 (Web page-Web site-Home page-Hyperlink)
5. **Content of these pages is previously prepared by the page developer and can't be edited ……**

 (Browser-Static Web page-Hyperlink-interactive page)

6. Using HTML commands in their design as well as for other languages…….

(HTML-Static Web page-hyperlink-interactive page)

7. Display content allows users to interact with and Processing ……..

(Browser-Static Web page-hyperlink-interactive page)

8. Do not allow users to perform any processing on content…….

(Browser-Static Web page-hyperlink-interactive page)

9. Display information to see and reading only……..

(Browser-Static Web page-hyperlink-interactive page)

10. Contact us page is the site of the Ministry of education an example.....

(Browser-Static Web page-hyperlink-interactive page)

Question 6: write scientific term:

1. The language used to design interactive Web pages help HTMl.
2. A Web page or more interconnected with each other under a specific name.
3. Electronic content document published on the Internet and is displayed by the browser program.
4. The first page of the Web site and through which go to other pages on the site.
5. Text or image is linked to a specific address, when pressed is going to that address.
6. One type of Web pages display information to see and reading only.
7. One types of Web pages using HTML commands in their design as well as for other languages.
8. One type of Web pages content of these pages is previously prepared by the page developer and can't be edited.
9. One type of Web pages using HTML commands in their design only.
10. One type of Web pages display content allows users to interact with and processing.

Preparatory Two –1st Term 2017 Questions Bank

11.One type of Web pages display content not allows users to interact with and processing

Stages of Web site creation and design

Question 1: tick (✓) in front of the correct term and mark (X) in front of the incorrect term:

1. **The first Stage of designing and creating the Web site is the planning Stage. ()**
2. **The second stage of designing and creating the Web site is the implementation stage. ()**
3. **The third stage of designing and creating a website is the Design stage. ()**
4. **The fourth stage of designing and creating the Web site is prepare and develop the web pages ()**
5. **The fifth stage of designing and creating the Web site is the publishing. ()**
6. **Web Design pages of the most important stages where Complete the design of the form of the home page and web pages. ()**
7. **Preparation and processing of text data through sound processing software. ()**
8. **Insert images to your computer via a cable connection between mobile and PC only. ()**
9. **Pictures are taken to Laboratories and playgrounds school using a digital camera. ()**
10. **The implementation stage is the stage of converting paper to design Web pages files. ()**
11. **Design stage of website pages means preparation and processing of text and image, audio and video. ()**

Question 2: complete the following statements:

1. **The first stage of designing and creating the Web site is.....**
2. **The second stage of designing and creating the Web site is.....**

3. **The third stage of designing and creating the Web site is.....**
4. **The fourth stage of designing and creating the Web site is.....**
5. **The final stage of designing and creating the Web site is.....**
6. **Stage..... where the diagram or flowchart will be drawn on paper and will include the website pages.**
7. **Stage..... Where the provision of audio and text files and save them in a folder.**
8. **Stage..... where Site address is booked online.**
9. **Stage..... Where publication of the site over the Internet and set it up to work properly**
10. **Stage..... Where determine the texts, images and video.**

Question 3: complete the appropriate phase dots place stages of design and construction Web site:

1. **Take a bunch of pictures for your school from classrooms and labs and playgrounds stage.....**
2. **Select the data and information which contained in Web pages Stage.....**

Preparatory Two –1st Term 2017 Questions Bank

3. **Reserve a URL for the site and store storage space on a server Stage.....**
4. **Specify various formats for Web pages such as background color and font size Stage.....**
5. **Create hyperlinks between Web pages Stage.....**

Question4: choose the correct answer than brackets:

1. Stage..... where the diagram or flowchart will be drawn on paper and will include the website pages.

(Publishing-planning-preparation and processing- Implementation)

2. Stage..... Design of form homepage and website pages.

(Publishing-planning-preparation and processing- Design)

3. Stage.... Where the provision of audio and text files and save them in a folder.

(Publishing-planning-preparation and processing- Implementation)

4. Stage..... Paper design is converted to Web pages.

(Design - Publishing - Planning – Implementation)

5. Stage..... to create hyperlinks.

(Design - Implementation - Planning - Preparation and processing)

6. Stage..... Site address is booked online.

(Design - Implementation - Publishing - setup and processing)

7. Stage..... You allocate storage space for the site on a server.

(Design - Implementation - Publishing - setup and processing)

Question 5: write scientific term:

1. Stage where the diagram or flowchart will be drawn on paper and will include the website pages
2. Stage of the site Prepare the text files and save them in a folder
3. Stage of the site to Create the necessary hyperlinks to connect the different pages
4. Stage of the site where a web address is taken and the storage capacity is decided to save on one of the servers
5. Question6: compare between the types of image files with the extension JPG-GIF-BMB-PNG:

In comparison	PNG	GIF	JPG	BMB
In terms of movement				
Larger in size				
At least in size				
The most commonly used on the Internet				
most used				
Compatibility with different operating systems and phones				

Preparatory Two –1st Term 2017 Questions Bank

Question 7: Complete:

1. In the planning stage to build a Web site the action follows:

 1……., 2…….

2. In the design of Web site pages stage the action follows:

 1……., 2……., 3…….

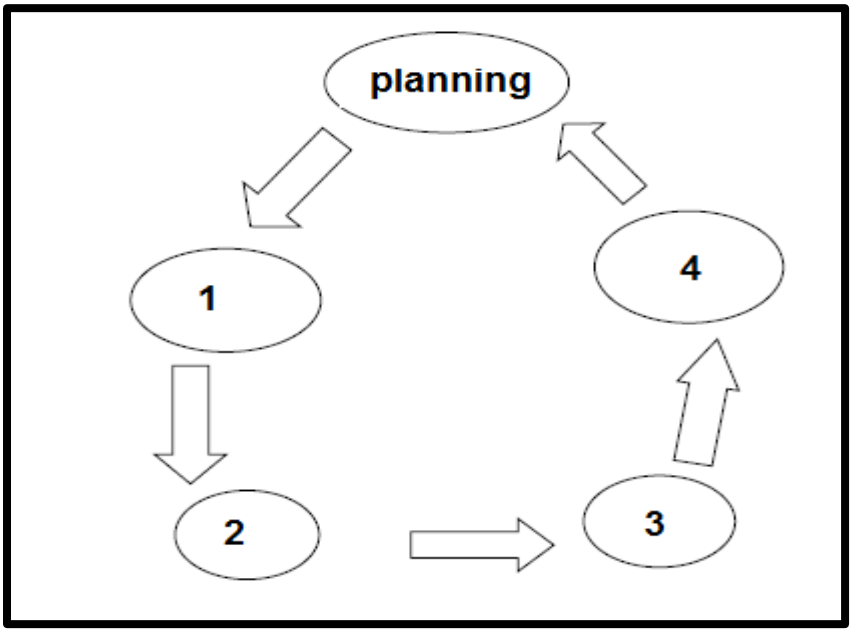

3. In the preparation and processing Web site pages stage The action follows:

 1……., 2……., 3…….

4. In the stage of publish the site through the internet the action follows:

 1……., 2…….

Question 8 : Complete the following figure, which shows the stages of design and create a Web site:

1. …… 2. ……

3. …… 4. ……

Preparatory Two –1st Term 2017 Questions Bank

Creating and processing audio files

Question1: tick (✓) in front of the correct term and mark (X) in front of the wrong term:

1. The symbol  used in Audacity program to start audio recording. ()
2. The symbol  used in Audacity program to stop audio recording. ()
3. The symbol  used in Audacity program to stop audio recording. ()
4. Audacity program is one open source software. ()
5. Audio files can be processed by deleting or adding special effects. ()
6. From the menu Effects is chosen one the required effects. ()
7. When selecting "Reverse" effect in Audacity program section start is reversed with the end. ()
8. When selecting "Repeat" effect in the Audacity program selected section is repeated. ()
9. Different types of audio files extensions in the quality and purity of sound. ()
10. Wav sound is characterized by extension that the highest quality of the extension Mp3()
11. Wav sound is characterized by extension that less storage the extension of Mp3. ()
12. The sound is characterized by extension Mp3 as appropriate for publishing online. ()
13. To cut an audio clip select the section, and form file menu select command cut. ()
14. To paste audio clip in another audio file from the edit menu select command past. ()
15. To delete a voice clip select section and press Home key on the keyboard ()
16. Required to create an audio file for your school, download a program creating and processing audio. ()
17. You can enter the computer's audio through headphones. ()
18. You can select the audio clip that you want to delete. ()

19.Timeline of the Audacity program shows its sound ()

20.Audacity program works on operating system Linux only. ()

Question 2: complete the following statements:

1. Uses Program..... to creating and processing audio files
2. The symbol  used in Audacity program to ……
3. The symbol  used in Audacity program to ……
4. The symbol  used in Audacity program to ……
5. In Audacity program from the menu..... Choose one of the desired effects
6. In Audacity program when choosing an effect..... Reversal of the beginning of the section with ending
7. In Audacity program when choosing an effect..... The selected section is repeated
8. To cut an audio clip, select the section, and from menu ……..select the command cut.
9. To paste audio clip in another audio file from the menu edit select the command……..
10. To delete an audio clip determine section and press..... Of the keyboard.
11. To export an audio file from the File menu choose the command …….
12. There are different types of audio files like.....,……..
13. Export audio file extensions suitable choose..... From file menu
14. To delete a section of audio press the key..... From the keyboard
15. To add Opposite effect to the audio section choose Reverse from ……. menu
16. To add an effect of repetition we choose..... From effect menu

Preparatory Two –1st Term 2017 Questions Bank

17. To Sound recording press recording button.....and to listen to the audio press the play button……..

18.Program..... Open source software for creating and processing audio

19.For creating and processing audio on computers in the lab we need to input unit ……. and output unit.....

20. To create an audio file enter text data to the computer using.....

21. To finish from recording audio press the stop button

Question 3: Compare between the sound file with extension WAV and sound file with the extension MP3: In comparison (Storage, Sound quality and purity, preferred for internet)

In comparison	MP3	WAV
Storage		
Sound quality and purity		
Preferred for internet		

Creating and processing videos

Question 1: tick (✓) in front of the correct term and mark (X) in front of the incorrect term:

1. **Open shot program is one of the open source software. ()**
2. **In open shot program we can rearrange the tracks again after added. ()**
3. **In open shot program we can use an unlimited number of tracks to the project. ()**

Preparatory Two –1st Term 2017 Questions Bank

4. In open shot program the ruler shows current time on timeline. ()
5. In open shot program Play Head read current clip that stands in the timeline. ()
6. In open shot program to make a preview of the video we press  ()
7. To add a new path Click the Add button path.  Form .Edit Toolbar ()
8. You can rearrange the video scenes mode tracks by clicking and dragging. ()
9. In open shot program the project name can be in English or Arabic language. ()
10. In open shot program the effects are added by clicking on the tab Transition. ()
11. In open shot program Add transitions by pressing tab Effects. ()
12. In open shot program you can add text to video scenes. ()
13. In open shot program the file name must be in English. ()
14. In open shot program the text is placed at the beginning of the video only. ()
15. In open shot program the name of project must be language in Arabic. ()

Question 2: complete the following statements:

1. The advantages of Open Shot program ……,……,……
2. …… to show the time length on the timeline
3. In open shot program …… read the current clip in the timeline
4. Images and sound files are imported in the program Open Shot from the file menu and Select command ……..
5. The command used to divide the clip into two slides while keeping two slides
6. In open shot program the project name must be in the language ……
7. In open shot program command Keep both slides after execution is being kept ……
8. In open shot program command Keep left slide after the execution is being kept ……
9. In open shot program command Keep Right slid after the execution is being kept ……

10. **To delete an effect has been added to a scene the video by clicking the right mouse button on an effect icon and choose**

11. To export a video file from the File menu and be chosen command

12. There are different types of video files extension like …… , ……..

Question3: choose the correct answer than brackets:

1. **In open shot program command …….. After execution is being Keep two slides together**

 (Keep left slide - Keep both slides - Effects - Keep Right slide)

2. **In open shot program command …….. After execution is being Keep left slide only**

 (Keep left slide - Keep Both slides - Keep Right slide - Effects)

3. **In open shot program command …….. After execution is being Keep Right slide only**

 (Keep left slide - Keep Both slides - Keep Right slide - Effects)

4. **To export a video file from the File menu and be chosen command**

 (Export Video - Video - Keep Right slide - Effects)
